**STRATEGIC PLAN: REFORM BUSINESS PRACTICES TO ENSURE EFFICIENCY,  
EFFECTIVENESS AND HIGH ETHICAL STANDARDS**

The School Board is in the process of selecting a new Inspector General. There have been on-going discussions concerning the qualifications and job description for this position, as well as discussions about the appropriate reporting lines, autonomy and independence of the School Board's Inspector General.

Subsequent to the selection of the Inspector General, the Board will need to negotiate a contract for the position, which includes an appropriate evaluation process, goals and objectives. Currently, the School Board rule governing the Inspector General has a number of provisions that should be discussed and clarified to ensure that the School Board and the new Inspector General have a clear understanding of the guidelines for the Office of the Inspector General (OIG).

This agenda item recommends that the School Board conduct a workshop in anticipation of hiring the Board's Inspector General. This item also recommends clarifications and modifications to the School Board rule governing the OIG.
