**STRATEGIC PLAN: IMPROVE INTERNAL AND EXTERNAL
COMMUNICATIONS THROUGHOUT THE DISTRICT**

School library media centers are integral to the school's instructional program, providing a wide variety of current informational resources that support the total school curriculum, motivate student reading, and further student mastery of Florida's Sunshine State Standards. Various studies, including a 2003 Florida study, *Making the Grade: The Status of School Library Media Centers in the Sunshine State and How They Contribute to Student Achievement*, have explored the correlation between the school library media program and student achievement. This correlation is a result of a collaborative approach to information literacy instruction. This collaboration among library media specialists, classroom teachers, and administrators facilitates the integration of library media resources into the school's curriculum.

The school library media center is a place where students may further explore, classroom subjects that interest them, expand their imagination, delve into areas of personal interest, and develop the ability to think clearly, critically, and creatively about the resources they have chosen to read, hear, or view. To focus citizens' attention on school library media center resources that empower students to learn and grow, the American Association of School Librarians (AASL) annually designates April as School Library Media Month and National Library Week.

This year, the AASL theme for School Library Media Month is "**Come Together@ your library®.**" School Library Media Month and National Library Week draws attention to the importance of reading and promoting school-wide reading activities throughout the District.

School Library Media Month and National Library Week draws attention to the importance of reading and also promotes school-wide reading activities throughout the District.
