

## MEMORANDUM

TO: All Locations

FROM: Information Technology Services (ITS)

SUBJECT: **NEW INTRANET WEB APPLICATIONS SCREEN**

On Wednesday, July 2, 2003, a new version of the Intranet Web Applications screen was put into production. The new version features an enhanced user interface and improved functionality. All existing web applications such as the Web Interface for Special Educators (WISE), Student Performance Indicators and Mainframe Terminal Sessions are available.

To provide easier access to the Intranet, ITS has added a button to the MDCPS homepage. The **MDCPS Intranet** button is located on the left side of the page. When you click on this button, you will be taken directly to the Intranet Login screen. To access the Intranet from the homepage, you must be logged into the MDCPS network. To access the Intranet from home you must have a MDCPS dial-up account. Employees must have CICS security authorization to login to the Intranet.

To take advantage of the enhanced features, users should access the site with Internet Explorer 5.01 or higher. A Web Browser – Upgrade Notice will be displayed on computers that are running a lower version of Internet Explorer. The latest version of Internet Explorer is available from the following link:

<http://www.microsoft.com/windows/ie/default.asp>.
