

TO: All Locations
FROM: Information Technology Services (ITS)
SUBJECT: **VIRUS ALERT – W32/SWEN@MM**

Internet and Outlook e-mail users need to be on the look out for the “W32/Swen@MM” virus. In some cases, this virus represents itself as a Microsoft Security Update that includes instructions for performing a security update. **If you receive one of these messages with a Microsoft Security Update you must delete the message. Do not follow the instructions.** All Microsoft updates must be done directly from the Microsoft website at: <http://v4.windowsupdate.microsoft.com/en/default.asp>.

The virus contains its own SMTP engine to construct outgoing messages and mails itself to recipients extracted from the infected machine. Other methods of infection include copying itself over network shares (mapped drives), sharing itself over the KaZaa P2P network or sending itself via International Recorded Carrier (IRC).

E-mail messages may have the following characteristics:

From: Email Delivery Service (kmailengine@yahoo.com)
Subject : Returned Response
Body: Undeliverable mail to (e-mail address)
