TO: All Locations

FROM: Information Technology Services (ITS)

SUBJECT: **VIRUS ALERT – W32/Mimail.c@MM**

Internet and Outlook e-mail users need to be on the look out for the "**W32/Mimail.c@MM**" virus. The virus contains its own SMTP engine to construct outgoing messages with an attachment and mails itself to recipients extracted from the infected machine. If you receive one of these e-mail messages, delete the message and **DO NOT** open the attachmentl

E-mail messages may have the following characteristics:

From: Bogus addresses such as james@dadeschools.net, james@abc.com, or james@xyz.com
Subject : Re[2]: our private photos (plus additional spaces then random characters)

Body: Hello Dear!,
Finally, i've found possibility to right u, my lovely girl :)
All our photos which i've made at the beach (even when u're withou ur bh:))
photos are great! This evening i'll come and we'll make the best … :)

Right now enjoy the photos.
Kiss, James.
(random characters - the same as those terminating the subject)

This message is being cleaned by the District's AntiVirus Software and is **NOT** infected with a virus. When cleaned by the District's AntiVirus Software, the attachment will have the name 'alert.txt'. If you receive this message and the attachment does not have 'alert.txt', **do not** open the attachment. In all cases, users should delete the message without opening it.

All locations are reminded that it is the responsibility of each user to update their VirusScan software. Each user should set their VirusScan software to update DAT files on a weekly basis. Instructions for scheduling the VirusScan software to update automatically are available from the following website:

http://its.dadeschools.net/virus.htm

If you do not have McAfee installed on your computer, information for obtaining the District's free McAfee antivirus software is available at the following website:

http://it.dadeschools.net/virus.htm
