

FREE INTERNET SAFETY SOFTWARE AND FUNDRAISING FOR MDCPS!

Do your children use the Internet at home?

Can you be there every time your children are on the Internet?

We can help.

Miami Dade County Public Schools and Superintendent Alberto Carvalho are working together with the United Way of Miami-Dade and Dolphin Digital Media to bring you a free trial of revolutionary internet safety software (Dolphin Secure) for your family. In addition to this FREE trial, you have the opportunity to raise money for your child's school.

Many parents cannot monitor every minute their child spends online.

Dolphin Secure is an easy to use software that downloads onto any computer in the home in less than ten minutes, giving you the tools to protect your children from online threats such as pornography, cyber-bullying and unsolicited chat requests. Now for the first time, parents are able to set the parameters for where their children go and who they can talk to online. Every time a child goes online, they must log in by swiping their fingerprint. Once Dolphin Secure knows who is going online, your parental settings for that child are enforced EVEN IF YOU ARE NOT HOME from any computer that is Dolphin Secure

U.S kids report spending an average of 1:29 hours per day on the computer. This much exposure to the Internet could introduce them to the dangers lurking in the online world.

The problems: Did you know?

- **Pornography**-The average age of a child's first Internet exposure to pornography is 11? Many times, these instances happen on accident as pornographic websites design their names hoping children misspell one of their favorite websites.
- **Predators**- FBI officials estimate that as many as 50,000 sexual predators are online at any given time? In this case, the power is in the hands of the sender, leaving children defenseless.
- **Cyber-Bullying**- A recent survey by NBC of 40,000 kids showed that 85% of middle school children have been cyber bullied, and only 5% of them told their parents or school? The most damaging form of cyber-bullying is when children hack or break into other children's accounts by easily guessing or stealing a password, sometimes leaving devastating consequences.

The Solution: Dolphin Secure. Because we require a fingerprint log in to our system, Dolphin Secure provides a line of defense to all three of these problems:

- **Pornography**-*Dolphin Secure can make sure you know exactly which websites your children can go to. How? Start off with Dolphin's white list of over 1,000 appropriate websites for children. We monitor and update our list all the time, so you may accept our full white list or easily choose from it. You can customize this list for each child in your family, adding to it and deleting sites as you choose.*

- **Predators-** *With Dolphin Secure, a parent knows exactly who is talking to their children, putting the power back to the receiver. How?* Set the boundaries of who your child can talk to online, through a wide variety of options, including:

- Everyone within the Dolphin Surf social network.
- Only children of a specific gender.
- Only other children within a specific age range chosen by you.
- Only a select group of handpicked friends.
- No one at all.

Dolphin Secure takes a credit card number and home address upon registration, and also reserves the right to work with any law enforcement agency to keep predators off of their system. All other chat applications on the computer are blocked from a child's use, thereby ensuring that **everyone your child chats with online** is registered with Dolphin Secure.

- **Cyber-Bullying-** *Dolphin Secure's fingerprint log in makes account impersonation and hacking nearly impossible. How?* The current password system does not work. Our fingerprint technology keeps your child's account accessible only to them as well as keeping it safe. Using the same boundaries of customizing who your child talks to, you can have the peace of mind knowing your child is chatting in a safe and secure environment.

HOW TO SIGN UP FOR THE FREE TRIAL

With the help from Dolphin Digital Media and the United Way of Miami-Dade, Dolphin Secure proudly extends this special offer to everyone in Miami Dade County Public Schools to keep our kids safer. Dolphin Secure will be donating \$3 of every subscription to the enrolling child's school. A list of codes will be provided during the registration process on www.dolphinsecure.com for you to choose from. To receive your FREE trial, please enter the code that corresponds to your child's school. Once the code is activated your child will receive Dolphin Secure FREE for thirty days. After the FREE trial expires, you will be charged a very affordable \$5 a month one-year subscription as well as a \$15 fingerprint reader, backed with a 30-day money back guarantee (Essentially 60 FREE days!).

We encourage you to take advantage of this great offer, and help us keep your children safe online.
