Miami-Dade County Projected Positivity Rates

Gating Criteria - 1

- A sustained positivity rate of less than 10%, trending towards 5% for 14 days, with a goal of 3%

Gating Criteria Recommended by Medical Experts

1. A sustained positivity rate of less than 10%, trending toward 5% for 14 days, with a goal of 3%.
2. A steady reduction in the number of those hospitalized for COVID-19 or influenza-like symptoms for 14 days.
3. A sustained reduction in ICU bed occupancy due to COVID-19 for 14 days.
4. A continuous reduced community viral burden (total number of virus-positive individuals) for 14 days.
5. An increase in COVID-19 specific viral test availability with decreased wait time to receive a test.
6. A decreased response time for test results to less than 48 hours wait time.
7. An increase in quantity and quality of contact tracing that provides prompt and needed input to decision-makers.
8. An increased number of general vaccinations for school-aged children that meets the goals of herd-immunity in our community.

Daily and 14 day moving average positivity projected to cross 5% on or about 9-17

Actual positivity will likely flatten as it approaches lower levels
