SUBJECT: STRATEGIC PLAN WORKSHOP

A well-thought and dynamic strategic plan is essential in managing change in any organization, and the most valuable tool in re-positioning a large bureaucracy. A thoughtful plan will set goals and objectives as well as address resources necessary in completing such efforts.

Miami-Dade Schools last developed a strategic plan in October 2000. While it was an earnest effort at advancing the mission of the school district, there exists an opportunity now to update and review those objectives for greater impact.

Details of this agenda item will be forthcoming.
