**SUBJECT: ENHANCING PUBLIC AWARENESS OF CONSTRUCTION
 PROJECTS**

**COMMITTEE: LEGISLATIVE RELATIONS, PUBLIC RELATIONS AND
 PERSONNEL SERVICES**

The timely construction of a new school or the expeditious renovation of an existing one is of critical interest to all stakeholders of our community. Parents, teachers and surrounding resident-taxpayers maintain a strong need to be kept abreast of the cost, details, timetable and progress of each major capital project in the current 5-year work plan.

The opportunity exists to make more information accessible for increased public awareness and project accountability of each major construction project.

This can be accomplished in any number of ways such as including the complete 5 Year work plan on the by dadeschools.net portal as well as detailed listings of new projects and major renovations. Another opportunity might also be more details listed on any construction site signage.

**ACTION PROPOSED BY
FRANK J. BOLAÑOS:**

That The School Board of Miami-Dade County, Florida direct the Superintendent to develop a user-friendly interface on the dadeschools.net portal where construction information on each new school and major renovation project would be listed including, but not limited to, budget, timetable and progress status. For the purpose of this item, any project which adds student stations or has a project cost of \$2 Million will be considered a major renovation.
