

Frank J. Bolaños, Chairman

SUBJECT: CITIZENS CONSTRUCTION ADVISORY COMMITTEE
COMMITTEE: INNOVATION, EFFICIENCY & GOVERNMENTAL RELATIONS

The Florida Legislature created the Land Acquisition and Facilities Maintenance Operations Advisory Board (LAFAB) in 2001. Since its inception, the dedicated and community-minded members of this body provided the Miami-Dade County School Board with valuable and independent analysis and counsel. Their collective experience and guidance positively influenced both the Superintendent and members of the School Board and precipitated new and effective approaches to resource allocation and the overall management of the school district's operations.

Although significant reforms and administrative efficiencies have been successfully implemented within the School Board and the public school system, this is an appropriate time to explore a new approach to sustaining the spirit of positive change and reform stimulated by the LAFAB .
