School Profile:

This is a multi-phased GOB project to convert a timeworn senior high school located at 13835 N.W. 97 Avenue, Hialeah, into a new K-8 Center. The current facility has a capacity of 406 student stations (SS) and is located on approximately 10.7 acres in the North Region Center. The campus has eight permanent buildings and covered walkways with a total of 69,900 GSF, built as modular facility. Buildings 01 thru 03 and 05 thru 08 were built in 1989. Project Scope/Phasing:

The new K-8 conversion is programmed to house 1,209 SS and be completed in 4 phases. The intent is for the CMR firm to provide pre-construction services for Phases 2A & 2B. Then, at the option of the Board, when funding becomes available, the CMR may be required to provide pre-construction services for Phases 3 and 4. At that time, CMR services would be negotiated and, if successful, an amendment to the CMR Agreement would be presented to the Board for approval. Or, the Board may re-advertise the required services and select another CMR firm.

PHASE 1 is currently underway under a continuing contract and includes remodeling and renovations of Buildings 01 and 03, a new Pre-K playground area and will house 126 SS with occupancy scheduled for August 2016.

PHASE 3 (scope of work to house 266 new SS; to be negotiated at a future date - funded FY 2018-19).

- New building(s) with nine elementary classrooms (162 SS), two bilingual classrooms (44 SS), one Exceptional Student Education (ESE) classroom (10 SS), one K-5 art suite and one level 6-8 music lab (50 SS) totaling 18,197 SF. Building(s) must be designed to accommodate a future second level.

PHASE 4 (scope of work to house 399 new SS less 40 SS = net 359 SS); to be negotiated at a future date - funded FY 2019-20).

The project must be designed, phased, coordinated and constructed to maximize safety and minimize disruption to the existing, occupied campus. New construction shall be designed and constructed to meet the U.S. Green Building Council Leadership in Energy and Environmental Design (LEED) for Schools rating system.

Construction Delivery Method

To minimize disruption to students and faculty during construction, and in accordance with the M-DCPS Construction Delivery Method Matrix, the CMR delivery method has been selected for this project. However, the Board reserves the right to utilize an alternative delivery method, if deemed to be in the best interest of the Board.
