INTRODUCTION

The 2025-2026 school year marks the forty-fifth (45th) year that citizens are involved in the Attendance Boundary Committee (ABC) process. This committee was established by the School Board and the Superintendent after numerous citizens expressed concerns about the lack of community involvement in attendance boundary recommendations. Subsequently, each year community members from various civic and educational advocacy organizations have diligently served on this committee reviewing recommendations of proposed attendance boundaries for new schools and changes to the boundaries of existing schools.

The challenge this year is to continue to comply with the state mandate of Class Size Reduction while providing specific direction/information to communities as attendance boundaries are modified for the upcoming school year. To ensure the appropriate distribution of students as new student stations are delivered, current boundary procedures allow the Superintendent of Schools, with the assistance of School Leadership and Performance and the Office of School Facilities, to develop proposed boundary recommendations. The proposed recommendations were presented at Region Community Meetings to the affected school communities. The boundary recommendations were then reviewed by the 17 Attendance Boundary Committee members.

The development of attendance zone recommendations with community involvement continues to be a primary goal of this School Board, the Superintendent of Schools, and the ABC. Attendance boundary changes have been determined after a number of factors were considered. The factors are as follows:

1. Ability to conduct a viable educational program due to declining enrollment
2. Compliance with Class Size Reduction Mandate
3. Impact on Exceptional Student Education programs
4. Use of available student stations within contiguous areas
5. Degree and extent of transportation
6. Programmatic impact due to lack of student housing
7. Reduction of the number of schools students must attend
8. Integrity of feeder patterns
9. Impact of new residential developments
10. Construction of new schools
11. Impact of changes to other school boundaries

Attendance zone recommendations are long-range solutions designed to stabilize affected schools and bring schools within state mandate. Determining attendance boundaries through ABC is a yearlong process with all meetings open to the public.

The recommendations that follow were reviewed by school and community organizations, i.e., Parent Teacher Association (PTA), Parent Teacher Student Association (PTSA), Educational Excellence School Advisory Council (EESAC), student leaders, etc. on March 12, 2026, staff presented the recommendations to the Educational Opportunity and Access Advisory Committee (EOAAC). EOAAC will present its report to the School Board at the Conference Session on Attendance Zone Recommendations which will be held on April 22, 2026.

ATTENDANCE BOUNDARY COMMITTEE (ABC)

Members of the Attendance Boundary Committee and their alternates are to be commended for their dedication and hard work in reviewing recommendations for the 2025-2026 school year. Miami-Dade County Public Schools and the community have been well served by their dedication and interest in the education of our students.
